

DANIEL RAJ V

LyTrix Language System Developer

EDUCATION

BACHELOR OF TECHNOLOGY (INFORMATION TECHNOLOGY)

- Loyola-ICAM College of Engineering and Technology (LICET)

2026 – Present

SKILLS

- Programming Languages:** C, Java, Python
- Core Concepts:** Data Structures, System Design, Basic OS Concepts
- Systems & Tools:** Linux, Terminal, Git (Basics)
- Focus Areas:** Compiler Design, Interpreter Development, System-Level Programming

LANGUAGES

- Tamil
- English

PROFILE INFO

I like understanding how systems work internally rather than just using them. I'm interested in compilers, execution flow, and building structured logic. Most of my work focuses on breaking problems down and keeping things simple and clear. LyTrix reflects my interest in system-level design and language architecture.

PROJECTS

- LYTRIX LANGUAGE SYSTEM** Personal Project 2025 – 2026
 - Built a custom programming language with interpreter.
 - Developed interpreter (LyTrix-R) for expression evaluation and type handling
 - Working on compiler (LyTrix-Q) using QBE backend
- LYTRIX VS CODE EXTENSION** Personal Project 2026~
 - Developed a VS Code extension providing syntax highlighting and language support for .lytx files
 - Designed token rules and structure for future scalability and editor integration
- E-SEVA COMPLAINT MANAGEMENT APP** Academic Project
 - Built a full-stack web application for complaint registration and resolution
 - Used MySQL for backend and HTML, CSS, JS for frontend

ACHIEVEMENTS

- | • 2025 | • 2026 | • 2026 |
|--|---|---|
| 1st Place – Try.Code Coding Competition
Organized by ISTE | 1st Place – Code Relay TECHNOVA
Organized by CSI | Configured a dual-boot Linux environment with Arch Linux and Hyprland for development |
